FOREWORD

For more than 45 years, we have been interested in Milking Shorthorns. We started to work for the late Ralph Clampitt in 1928 at New Providence, Iowa, later buying half interest and farmed the farm on stock shares. In 1943 we went on our own, and it was at this time we named the herd "Mysha."

We have always been a part of the official testing and classifying programs. The herd has usually been shown at about four or five major shows each year. We have shown many firsts and champions at these shows.

We have made every effort to satisfy our customers throughout the years, and treasure the many friends that we have made.

It is with a great deal of regret we part with the cattle, but trust many of you will get as much pleasure and profit from them as we did.

NORAN AND MYRL SHAVER.
